The Standard in Wellsite Productivity

We are 18 iconic brands, working together to provide an end-to-end suite of advanced energy technologies, products and services.

[Our Brands](#)

Performance Redefined

Backed by a network of proven expertise, we're delivering the advanced energy technologies our customers rely on to fuel the world around them.

[Who We Are](#)

Energizing the World

With a collective 440 years of experience in total wellsite management, we are focused on fueling the oil and gas industry with proven solutions and advanced technologies.

[What We Do](#)

Our Story

At Apergy, we offer the oil & gas industry tomorrow's technology, today. We're a team of constant questioners and tireless innovators, empowered by a comprehensive portfolio of standard-setting wellsite technology. We get up every morning driven to fuel our partners in the field and better the world we all live in. Life runs on energy – let's unlock it together.

[who we are](#)

Our Solutions

[Drilling Technologies](#)

Discover the diamond in drilling.

We're working hard to unlock energy and solve the most difficult engineering challenges you face. By teaming up at the wellsite and at the whiteboard, we're focused on fueling performance in the field.

[Learn More](#)

[Artificial Lift Technologies](#)

Artificial Lift is our passion and sole focus.

With a full suite of artificial lift products and services, we custom tailor solutions to optimize our customers' long-term potential in the safest, fastest, and most cost-effective way possible.

[Learn More](#)

[Automation Technologies](#)

Innovative automation solutions to drive the industry forward.

With a suite of intelligent software, predictive tools, and expert services, we enable our partners to visualize and optimize their wellsite performance, increase safety, and improve their ROI.

[Learn More](#)

Production Equipment

Engineered solutions for the toughest fluid-handling problems.

We're partnering with our customers to fabricate cost-effective production and separation solutions for midstream, upstream, and power markets. Globally, our equipment improves production, reduces costs, and maximizes flow time.

Our Commitments How We're Shaping the Future of Energy

Advocates for Customers

Succeeding Together

Every day you'll find us in the field, with our sleeves rolled up and our hands dirty. We're relentless advocates for your business and believe face-to-face collaboration is the best way to solve problems and seize opportunities.

Thanks to our constant focus on innovation, proven quality, and superior customer service, more of the world's energy suppliers are unlocking energy with us in the most demanding exploration, development, and production projects.

Technology with Impact

Powering Performance

We don't innovate for innovation's sake. We focus on the output – on crafting technologies that deliver real results and redefine best-in-class standards. Our success is your proven performance.

Driven to Improve

Defining Possibilities

Continuous improvement energizes us. We're insatiably curious and always learning. Expert in what is today and committed to the pursuit of what could be tomorrow. We know that better is out there and are working together to unlock it.

- **Sustainability & Environmental Practice**

Every part of our business as a global oil and gas company, is committed to protecting the health and safety of people, reducing adverse environmental impacts, and continuously improving the world in which we all live.

- **[Energy Solutions](#)**

Apergy is your partner in developing Life of the Well Solutions. We have industry-leading brands beginning with Drilling Technologies in US Synthetic diamond cutters and bearings, downhole pressure testing from Quartzdyne and a full suite of Artificial Lift and Automation Technologies. We collaborate with our customers to reach a customized solution in every area, every day.

[Learn More](#)

[Careers](#)

We are dedicated to serving our employees and their families. We recognize the right of every employee to be properly trained, have access to the right equipment, tools, and materials, and work in a safe environment.
